Enhancements:

- **#13728** It is now possible to process EFT Payments when registered as Zimbabwe.
- **#13436** Sage Pay Statements are now automatically available through the Bank Manager.
- **#13491** There is a new Toolbar icon for Connected Apps.
- **#13533** Sage Pay Statements are now manually available through the Bank Manager.
- **#13552** There is a new Currency Conversion program that is compatible with Version 14.
- **#13616** There is a new splash screen with a link to www.sageonlinetools.co.za
- **#13888 & #13915** A new Web Registration form was added that will display for South African Cover customers who are connected to the internet and whose registration will expire in 30 days.
- **#13797** There is a new zone called My Customers” Zone where business owners customers can view their outstanding invoices, statements & Pay now via Sage Pay.

Defects:

- **#7609** When registering online the authorisation code will now be visible.
- **#9085** View...Customers...Analyse Sales...Sales by Item report. When you view the report by Inventory Group and then rerun the report, the previously selected inventory groups will display by default.
- **#9870** The System Changes Audit Trail report will no longer report a change on tax percentages when no changes were made.
- **#10789** The Supplier Age Analysis report will now display totals for the last category.
- **#12889** The Help File now launches from inside Forms Designer.
- **#12993** Mobility was renamed to Connected Apps.
- **#13284** You will no longer receive a message that the user’s password is in use when doing a backup from the Process...Count Inventory screen.
- **#13376** Customer Balances Report. The report will now print all customer’s balances when the Print Zero Items option is selected.
- **#13424** The Cash Book screen will no longer be accessible by users who do not have access.
- **#13459** The Entry Type Details report will now print for the selected dates and not the whole period.
- **#13550** The Grand Totals were displaying incorrectly on the Tax Type report after running a Year End.
- **#13603** There used to be a restore error 527 when a temporary file existed in the backup file.
- **#13853** You would have received a message that the set of accounts that you are trying to add has to be upgraded to Pastel Version 12 when trying to add a company that was corrupted.
